Safety Climate Survey

This survey can be used as an invaluable listening post to solicit confidential feedback from your employees. The Safety Climate survey not only identifies the critical factors to improve the safety climate, it can also be used by organisations to identify key safety issues that, if addressed, will improve organisational safety risk analysis. Results of the survey can provide critical information to include in the company's planning cycle and safety strategy.

The Safety Climate survey:

- is broken into 3 main areas; a Safety Awareness Index, The Key Priorities and Written Comments
- has 40 questions broken into 10 themes
- measures awareness across key themes
- can be conducted using a combination of on-line and paper based questionnaires, depending on which is easier for the employees and the organisation
- questions are in plain English
- demographics can be customised
